thanks for the info. I sent it to our park manager and regional manager to see if they have any problems. The scale of the map is such that it doesn't depict the juxtaposition of the rail to the park boundaries and developed areas. It seems like the rail runs easterly of the park closer to the highway 28. It may cross the wetlands or southerly portion of the lake outside our boundaries. We are concerned about hazards to navigation or any impacts on the federally funded area on the southeast, painted rocks area. If I get additional comments back I will pass it on to you. TERRY GREEN, State Parks. 4.29.03 1710
